

# HANDS FREE FOOT OPERATED CRIMPING STATION

**Designed to complement any workshop assembly area with regular requirement for crimping of electrical wire sets or looms**

## Low Cost / Rugged / Rapid and Reliable

### ADVANTAGES

- Safe, fast, hands-free operation.
- No power or compressed air required
- Quick and simple to set up and adjust
- Hand tool calibration unaffected
- 4-500 crimps per hour can be achieved
- Reduced operator fatigue
- Safer and cheaper than air or electric alternatives
- Reduces risk of repetitive strain injuries
- Provided in a flat pack form: 10 minute assembly time
- 10 days delivery time from order
- Use of hands with a squeeze force judgment is eliminated as the simple low pressure foot pedal reaches a stop at the end of each operation cycle
- Reduces mistakes such as insertion difficulties when using hands
- The crimp table accepts a range of tool types.
- Can be operated standing or seated on a chair
- Portable, ideal for out workers.
